# Concept

“Murder Mystery” is an immersive team building experience where teams step into the role of real investigators to **solve a mysterious murder case.**

Armed with case files, evidence and intriguing clues, you continue the unfinished investigation of private detective Dexter. Analyze information, connect motives and alibis, and uncover the truth step by step.

**Success depends on sharing information, combining insights and communicating clearly. Only teams that truly work together will solve the case.**

An intense mix of suspense, collaboration and clever deduction. One case. One chance to solve it.

**1**

## Search the case files

Dive into the investigation and uncover key clues. From suspicious documents to hidden details, every piece of information can make the difference. **Work together and make sure nothing is overlooked.**

**2**

## Unravel the mystery

Connect motives, alibis and evidence. Combine your insights and build your theory step by step. **Only teams that think sharply and communicate well will reach the right conclusion.**

**3**

## Unmask the culprit

Time to make your final call. Who is the culprit? Which motive makes sense? **Identify your main suspect and proceed with the arrest.**

## Communication

Information is scattered across different clues and team members. **Only by sharing insights, listening to one another and communicating clearly does the full picture start to emerge.** Teams that stay aligned will spot what others miss more quickly.

## Teamwork

Every player notices something different. By combining strengths and working together smartly, the puzzle pieces start to fall into place. **Strong teams trust one another and use everyone's talents to solve the mystery.**

## Keeping overview

Suspects, motives, alibis... everything starts to blur together. It is up to your team to bring structure to the chaos. **Keep the overview, connect the dots and guide the investigation step by step toward the right solution.**

# Unique game design

Beyond the sheer enjoyment of our activities, they are crafted to **address real-world challenges encountered in professional settings.** By emphasizing diverse facets in each activity, **we ensure that every team member can spotlight their unique strengths.** Through our team-building sessions, we set ourselves apart and truly make a difference.
